

Customary charges for 30-minute paramedical services – 2020

Customary charges are fees based on typical prices for treatments. We use typical price points to decide how much your plan will cover for a specific service or supply. The charges are usually based on the lowest of:

- Representative prices in the area where the treatment was provided
- Prices in any applicable professional association fee guide
- The maximum prices established by law

If your provider charges more than what's customary, you'll pay the difference.
